

*Compass Pointe has constructed a new fiber optic network that offers more reliability and greater speeds than ever before. This network has the stability and scalability to not only meet our resident's current internet needs but to support your needs in the future as well.*

## **GigaPointe Fiber Advantages**

### **EXTREMELY HIGH BANDWIDTH.**

GigaPointe Fiber is wired directly to your apartment and is not shared with other units in your building. Even if you have kids or roommates who are online gaming, checking email, streaming and/or doing homework, GigaPointe offers enough bandwidth so you can all have an excellent online experience.

### **AWESOME SPEED. SYMMETRICAL UPLOAD AND DOWNLOAD SPEEDS**

Every online activity requires both upload and download speed to run most efficiently. GigaPointe offers equal upload & download speeds at every level to support whatever your individual internet needs may be.

Other internet providers may offer 25 Mbps connections, when in fact it's more like 25 Mbps upload, 15 Mbps download. While a 10 Mbps speed difference sounds minimal, it can severely impact your online speeds at critical moments like while streaming your favorite show or online gaming.

### **INCREDIBLE RELIABILITY & SECURITY.**

GigaPointe's fiber network is more resistant to environmental conditions like inclement weather and electrical interference giving you continuous connectivity with virtually no interruptions or downtime.

Fiber optics do not emit electronic or radio signals which make it very difficult for hackers to intercept data transmissions. It's also easy to quickly identify compromised cables, which visibly emit light from transmissions.

## What you can do with GigaPointe

### DOWNLOAD AND STREAM.

**movies, music, TV shows, sports, podcasts and more**

With GigaPointe, downloading is very reliably fast, and streaming is buffer-free. Even if multiple devices are in use in the same apartment and are streaming or downloading at the same time.

### GAME ONLINE.

GigaPointe offers the best speeds for gamers. With symmetrical speeds, you can expect a seamless online experience with virtually no lag time. With a private connection you can depend on consistent speeds even at peak traffic times.

### VIDEO CHAT.

No dropped calls. Video chat improves significantly with symmetrical fiber speeds. A high download speed means you'll see and hear the other person better; a matching upload speed means they'll see and hear you better.

### CLOUD COMPUTING.

GigaPointe Internet provides the private connectivity and reliability that is more important than ever to ensure high-performance cloud computing.
